I am from Delhi. My father is a helper in the Industrial Area and my mother is a good House-wife. I work and love technology and I am interested in the IT co-operator sector, how I got my interest stirred in programming. I want to be a **Software Engineer**. So I joined NavGurukul and here I have studied Database Python, JavaScript and NodeJs, React, DSA.

Navgurukul(Training)

Total Experience

**1 year
(app) 2 year**

React.Js Projects

Hotel Management([code](#))

- This is an awesome project for me and learns more things about this project.
- In this project I used Nodejs, Reactjs and Mongodb tools.
- Admin can add hotel and edit all hotel facilities
- This is a Hotel search app using find your hotel near your city.

Google News ([code](#))

- In this Project I used google news API and use API integration in the react.js file.
- There are many categories in google news which you like to prefer to read the news.

Projects

Signup & Login Page ([code](#))

- This is a Signup Login with authentication and token using web page in react.
- In this project, i learn many things Routing, useState, Controlling, Compound.
- This is challenging for the first react web page.

Myntra E-commerce([code](#))

- In this project we have to make an e-commerce backend website using Nodejs and fronted React.js.
- In this project I have made an e-commerce website to all product insert and user purchase of this item.
- Here are some examples like clones which you have to help or instructions.

Node.Js Projects

Library Project ([code](#))

- The project name is library project in this project if new users then have to sign up and login password is secure.
- After login the user can register to get a library member card and after getting a member user can take a book. and users can update details and get details name or id and also delete membership.

Blogs Website like Medium ([code](#))

- This is a Website with the same functionality as a Medium Blog site where you can read other people's blog but if you want to post your blog then you have to sign up for it first. This project I have used **Mysql Database(knex query builder)**

E-commerce -Turing([code](#))

- In this project we have to make an e-commerce backend website using knex builder mysql in Nodejs.
- In this project I have made an e-commerce website to all product insert and user purchase of this item.
- Here are some examples like clones which you have to help or instructions on how to do this project there are given guidelines or instructions on github read.me file

Zomato_Restaurant ([code](#))

- This is a Zomato Restaurant Project. In this project you can find a zomato restaurant near your city and use the zomato **API key** using the geocoder library. If you sign up then you can login and find a zomato restaurant near your city, otherwise you have to register and verify your mail you receive an OTP on this mail by using the Nodemailer **module**. This project I have used **Mysql Database(knex query builder)** to store all user information.

Elite Mindz Technology(New Delhi)

I was working as a **software developer** in an Elitemindz company for the **one year**.

I worked here 2-3 project there in javascript languages ,**nodejs**, **react.js** and **nest.js** as a full stack developer here.

Sarvacharya Information Technology(New Delhi)

I was working as a **web developer** in a **Selltm** company for the **5th month** .

I worked there in different languages like **nodejs** and learned many things.

Experience

Selltm (Gurgram)

I was working as a **web developer** in a **Selltm** company for the **6th month** .

I worked there in different languages like **nodejs**, **python**, **selenium** and **automation**, **data scraping** and **some application testing** and learned many things.

Working as Training and Placement in NavGurukul

I was working as a Training and Placement coordinator in Nav Gurukul to help students to learn code and also track their progress. And students who completed their course and are ready for a job then we provide them with the mock interviews.

NavGurukul (Graduating - June '19)

Attending a one-year residential course to learn Software Engineering, and I am working on various projects.

I came to NavGurukul and here I have studied Python, JavaScript and NodeJs.
