ABOUT ME

I am a frontend web developer, I develop web apps using tools like HTML, CSS, JavaScript, React.js, Next.js and other frontend tools and libraries. I'm also well versed with REST APIs, Node.js, Express.js, MongoDB and can develop backend or full stack applications if needed.

I started learning to code because I like programming and the concept of developing web apps using different tools and technologies. I find it amazing that I can learn new things almost everyday. Although I've studied Computer Science, I've gained most of my web development and programming skills from online courses and YouTube tutorials.

Apart from watching Netflix, hoarding courses (and completing too), watching tutorials, learning new tools and making projects on my PC is one of my favourite pastimes.

EXPERIENCE

CretSkill, Mayur Vihar, Delhi — React/Nextjs Developer

JANUARY 2022 - PRESENT

Responsibilities include developing React / Next.js components, adding functionalities and performing CRUD operations from/to our Django backend. Also helping our backend team in designing REST APIs and deploying the project in Google Cloud platform.
