I'm specializing in financial reporting, I have an ability to support a highly innovative and challenging environment through providing strength in regulatory reporting, analytic reasoning for data and explanations for what the figures mean in the right time to measure growing plans and business solutions that aim to **achieve** two major **goals of all businesses** Liquidity and Profitability with a mitigating the risks.

Highlights

- **Strength in regulatory reporting.**
 - **Financial statement analysis.**
 - **Develop periodic cash flow plans.**
 - **Budget forecasting and financial planner.**
 - **Microsoft office, MS-project and typing 50 wpm. Accomplishments**
-

- Met with individual department heads to understand how they wanted to receive their budget to actual information and defined reports that met their needs. Resulted in increased use of reports and **quicker decision maker** attention to variances.
- Advised executive team on financial status of the company monthly and make recommendation for **optimizing the net cash generated from operations** and revenue collection.
- I'm struggling to achieve **Equilibrium** and **flexibility** between Enhancing **Payment System** Speed, Efficiency, Security, and **cost reduction System** by eliminating redundant processes.
- I actually felt that my biggest achievement was yet to come. I was always looking to achieve more tomorrow than I did today and was striving to improve myself all the time.
