- Chatbot information system**
Final Year B.Tech Project
The College bot project is built using artificial algorithms that analyses user's queries and understand user's message. This System is a app application which provides answer to the query of the student. Students just have to query through the bot which is used for chatting. Students can chat using any format there is no specific format the user has to follow
The user can query college related activities such as date and timing of annual day, sports day, and other cultural activities. This system helps the student to be updated about the college activities.
