

Mangishetti Rakesh
Certified RPA UiPath Developer

Mobile: **+91- 9603357731**
E-Mail: rakeshshetti007@gmail.com

Profile Summary:

- Having Overall **3 Years** of IT experience, **3 years** of experience in **Robotic Process Automation** using **UiPath Tool**.
- Good understanding of Process Design documents, Technical Design documents on Automation space.
- Experience in Work queues configuration, monitoring using UiPath Environment.
- Different Workflows, Control flow & Branching, Working with Variables.
- **PDF** automation, **Email** Automation.
- Database Activities, Recording Window and Web with RPA UiPath tool.
- Implemented End to End Robotic Process Automation (RPA) using UiPath.
- Worked with Business Teams to create **PDD** (Process Definition Document) and developed separate **SDD** (Solution Design Documents).
- Designed, Developed and tested **Bot** tasks using RPA **UiPath**.
- Supporting business and technical teams during robotic projects and mitigate/Resolve risks and issues that may impact project schedule, cost, scope, quality etc.
- Worked with **OCR**, **ICR**, and Machine learning for designing in UiPath studio.
- Worked with the UI team to design the appropriate icon and display for the screens.
- Experience in staging and deploying the automation solution into test and live environments.
- Used UiPath **Orchestrator** for deployment, monitoring and management of UiPath Robot automation activity.
- Extensively worked on debugging application for fixing bugs and Production support.
- Involved in code review and fine tuning the code for performance related issues.
- Working closing with different teams in making changes in developed processes as per the technical design document (**TDD**) to meet the defined requirements.
- Worked with test teams during the Product test and **UAT** phases to fix assigned bugs.

Employer Summary:

- Worked as a software Engineer at Nexgen Technologies Limited, **Hyderabad** from July 2019 to till date.

Academic Details:

- **Completed Bsc in computer science** from SRK University in 2019.

Technical Skills:

RPA Tools	:	UiPath
Operating Systems	:	Windows XP, 7, 8 and 10.
Databases	:	MySQL.

Project 1:

Title	:	Credit Assessment Reporting
Industry	:	Financial
Role	:	Team Member
Technology	:	(RPA) UiPath

Project Objective:

This Process is for automating customer data preparation by fetching the details from various Applications and to prepare unique report with mortgage loan details, currency conversion details & Customer communication details. This process automates the below manual processes Fetching the Customer details from excel and arrange them on time zone and priority basis. BOT will pick customer records on priority order, fetch communication details from CRM. If the customer details are not found in CRM, details will be fetched from back end repository. BOT will fetch the Loan Amount, Interest rate and other details from customer details and compute the mortgage values with mortgage calculator it may also convert mortgage values to the currency that customer want repay. Finally BOT will create a report in PDF form, with all details fetched from the previous tasks and share with call center executives.

Roles and Responsibilities:

- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Handled end to end implementation for processes simultaneously.
- Designed Objects, Integrated Processes, and Handled Exceptions and deployed them successfully Orchestrator.
- Automated almost all kinds of applications like Web based Application, PDF Documents, Thin Client Application using RPA tool UiPath.
- Managed and communicated effectively with new resources to automate processes.
- Helped and trained Analysts in designing the complete workflow of process to be automated.

Project 2

Project : **Consumer Information Support**

Industry : Insurance

Technology : (RPA) UiPath

In this project there were an issues with customer Records due to Organizational Separation. In this process, there is an existing issue with multiple unique customer accounts grouped together into one customer account. The focus of this project was to record. Customer data support validation, cleaning and customer data management.

Roles and Responsibilities:

- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Designed Objects, Integrated Processes, and Handled Exceptions and deployed them successfully in Control Room.
- Automated almost all kinds of applications like Windows, Web based Application, Main frame Application, Java based Application and PDF Documents.
- Did assisted automation as well using VBA and RPA.
- Managed and communicated effectively with new resources to automate processes.
- Helped and trained Analysts in designing the complete workflow of process to be automated.

Project 3

Project : **UBO (Ultimate Beneficial Owner)**

Industry : Financial

Technology : (RPA) UiPath

UBO, in this project we are building a minimum viable product to demonstrate the capability of identifying UBO using Work Fusion Machine Learning Capabilities. Created Manual task that acts like a Search Engine for user to find UBO for selected Entity. Created an Information Extraction task that acts like a Wireframe for user where he can able to see multiple & dynamic document tabs as relevant documents for selected entity and also he can able to tag multiple group of answers from all the documents displayed on the Task.

Roles and Responsibilities:

- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Handled end to end implementation for processes simultaneously.
- Designed Objects, Integrated Processes, and Handled Exceptions and deployed them successfully Orchestrator.
- Automated almost all kinds of applications like Web based Application, PDF Documents, Thin Client Application using RPA UiPath tool.
- Managed and communicated effectively with new resources to automate processes.
- Helped and trained Analysts in designing the complete workflow of process to be automated.

PersonalProfile:

Name	Mangishetti Rakesh
Father's Name	Raju
Date of Birth	05/04/1998
Gender	Male
Nationality	Indian

Declaration: I am confident of my ability to work in a team with complete dedication and commitment. I hereby declare that the information provided above by me in this application is factual and correct to the best of my knowledge.

Rakesh.
